

BLUE STICKYBACK - SP002

Manufactured by **Printec** and converted by Servicom Pacific

Application

Recommended For: All business forms, press applications.

This is a fabric carcass blanket suitable for all business form printing with a clear adhesive that ensures preferential bonding to the blanket.

Customer Remarks:

- Best stickyback printing results
- Easy to clean & remove
- Blanket releases beautifully
- Peels off in one piece with no shredding

Technical Data

Colour	Blue
Description	A high performance stickyback printing blanket
Surface	Buffed
Thickness	2 Ply 0.90, 0.95, 1.04 mm (+/-0.051mm nominal)
Face Compound	Solvent Resistant Rubber Blend
Compressibility	9.0%
Hardness	83 Shore "A" 64 Micro Indent test
Adhesive Loop Tack	25 N/(10 mm)2
Adhesive Shear Strength	30 N/(10 mm)2
Smoothness	1.2 um

Features & Benefit

212 series simplifies installation and removal with excellent performance on press. Its closed-cell construction will not absorb moisture or solvents, allowing it to remain securely attached in even the most challenging printing environments. When changing from the press cylinder and leaves no residue behind.

212 series has a carcass construction of low-stretch cotton fabrics, bonded with inter-play rubbers which are specially compounded to provide a resilient base that resists compression set. The microcellular compressible layer offers superior recovery from smashes and sheet size changes.
