718 PLASTIC - SP188

Manufactured by **Printec** and converted by Servicom Pacific

Application

Unique surface designed to counteract the aggressive nature of modern day plastic printing inks. Blanket is conventional construction (non compressible) and has extremely resistant surface properties.

Ideally suited for use on product where the gauge tolerance is consistent around the substrate being printed.

Technical Data

Colour	Purple
Surface	Buffed
Thickness	1.95 mm
Hardness	75.0 \pm 3.0 Shore A
Roughness	0.50 a 1.00 Micron
Plies	4
