ROSA POLYMER - SP377

ISEGA
ISEGA Certified

Manufactured by **Tyref** and converted by Servicom Pacific
High Technology Materials

Application

Using the latest available polymer materials and production techniques, Tyref has developed a polymer plate of the highest quality.

The special surface and solvent resistant construction gives a dual purpose product suitable for long run WATER BASED (AQUEOUS) and UV coating applications.

Features

- Suitable for UV and water based (aqueous) coating applications
- Abrasive resistant surface
- Solvent resistant construction
- Excellent coating lay and transfer
- Superior sheet release
- No ink build up characteristics
- Durable, long life
- Consistent gauge tolerance
- Easy, consistent cutting and peeling
- Suitable for cutting manually or by plotter

Technical Data

Colour	Pink
Surface	Polymer blend
Thickness	1.35mm
Application	Water based and UV coating
Hardness	68 Shore A
Relief depth	1.00mm
