XTRA SPOT

SP383 1.95MM / SP385 1.35MM

Manufactured by **PHOENIX Xtra BLANKETS** and converted by Servicom Pacific
YOUR NEEDS FIRST

The optimum re-usable blanket solution for spot and full-surface coating

Xtra Spot has been developed as a stable and re-usable alternative to traditional fabric-backed varnishing blankets. The flexible polyester base guarantees stability along with easy, perfect cutting whether done manually or using a plotter.

Xtra Spot offers enormous stencil depth in all gauges and is equally suitable for UV and aqueous varnishes.

Features

- Ideal for UV and water-based coating applications
- High dimensional stability guarantees reusability
- High delamination resistance
- Suitable for manual and CAD cutting
- Enormous stencil depth

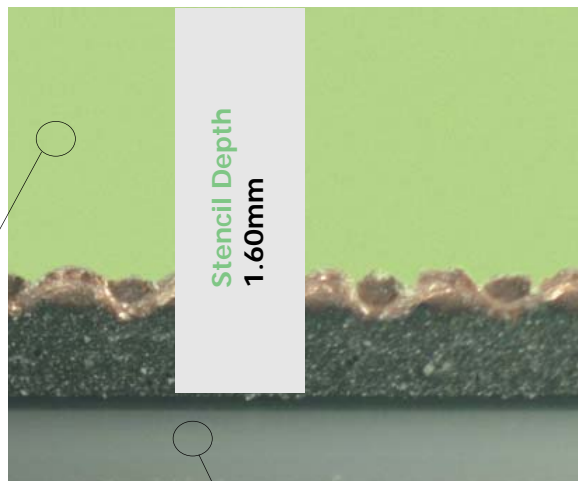

Technical Data

Colour	Green
Thickness	1.95 mm 1.35 mm
Elongation at 500N/ 50mm	≤ 0.6%
Tensile Strength	≥ 1.800 N / 50mm
Hardness (total)	ca./ approx. 80 Shore A
Surface rubber	ca./ approx. 59 Shore A
Roughness (RZ)	4 µm
Roughness (RA)	0.5 µm

Thickness 1.35mm

Thickness 1.95mm

*Optimised surface
for excellent coating
quality*

*Flexible polyester base for
outstanding stability*
